

iiNet Business VPN

Your virtual security guard

A Virtual Private Network provides site to site connectivity, making sure any private data sent between your business locations is delivered reliably and securely. This means individuals, offices, shops, and distribution centres, can access shared resources both locally and interstate.

Here's what you get;

- Priority support (6am to 6pm WST Mon-Fri)
- Free VPN traffic
- Built in contingency to reduce congestion
- Business grade service levels
- Compatibility with existing data services

Annex M

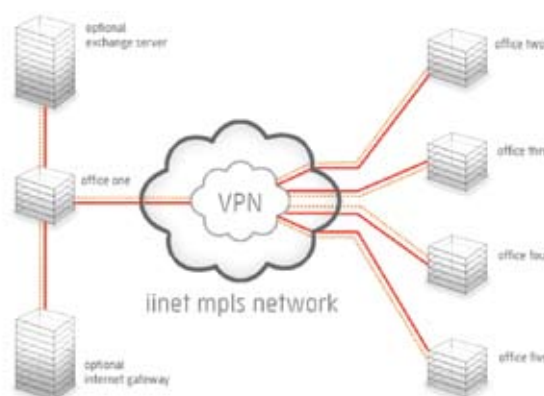

Perfect for sending big files, taking the delay out of video conferencing, running multiline VOIP and more. For a once off \$49 activation fee, Annex M will increase your upload speeds up to a blistering 2.75Mbps.

How does it work?

Running over our national Multi Protocol Label Switching (MPLS) network, you'll not only benefit from superfast download and upload speeds, all data originating from and sent across the VPN is uncouneted.

What can you do with it?

- Remote network access – perfect if you're out on site, or working from home.
- Spread software used from one centralized location to the rest of your network.
- Run all your converged VOIP, video and application services.

What does it cost?

Plan name	Speed	Price
VPN Connect 1	1500/256k	\$169 per site
VPN Connect 2	Up to 8000/384k	\$189 per site
VPN Connect 3 with Annex M	Up to 24000/1000k	\$269 per site

Service levels

- Response from a network operator within 2 hours of lodgment.
- Escalated to a Network Engineer within 8 hours.
- Full resolution forecasted within 12 hours of lodgment.

Hardware/Setup

Talk to our business support team about tailoring a setup that's right for you.

Get secure

To sign up or find out more information about VPN, check out www.iinet.net.au/business or give our priority business support team a call on **13 24 49**.

I'd make a good security guard.
(my karate stance is quite spectacular).
