**Business just got easier.**

**[iinet.net.au/business](http://iinet.net.au/business) 1300 796 137**

Minimum total cost over a 12 month contract is \$1038.75 (\$79.90 monthly NBN Business 1 plan fee x 12 months + \$79.95 activation fee). This does not include the cost of the modem or any optional extras not listed above which may be added or removed from time to time. \$1.40/GB. Plan minimum spend and cost per GB based on price of broadband only. Acceptable Use Policy applies to included calls.

Welcome to a new financial year. As we enter FY16, businesses across Australia are gearing up for another 12 months of hard work and new ideas alongside a shifting digital landscape.

Across industries, digital technologies are lowering costs, enabling innovation and changing the way businesses operate – particularly levelling the playing field between larger and smaller businesses. Over the past 20 years we have seen advancements in mobile, cloud computing and the Internet of Things.

To stay competitive, businesses need to move with the times and adopt technology that will allow them to collaborate and streamline. At the most basic level, a fast broadband connection can help move your business along as it's the foundation for other applications such as email, web conferencing and VoIP telephony.

Our free WiFi offer continues to help SMBs strengthen their customer offering – with every purchase of a Business Bundle, iiNet is offering businesses free WiFi access for their customers, modem and standard installation. People love a fast, reliable and free internet connection and our WiFi offer gives this to them with no additional cost to your business (page 4).

For those in NBN-ready areas, we're pleased to offer great value plans that give you super-fast fibre internet that can be bundled with a Business Netphone or Fibre Phone. With NBN rolling out across Australia, it's important to know your disconnection dates and how you can get NBN ready (page 9).

Regards,

## WiFi for your customers

In today's digital age, customers want to be connected to the internet when they're on the move. Whether they're at a cafe or at the shops, people love a fast, reliable and free internet connection.

Great news, now you can give it to them – at no additional cost to your business. The second best part? Your customers can access a WiFi network without touching any of your own internet quota.

iiNet is offering eligible businesses complimentary standard WiFi installation (including access point and modem) when you sign up for any Business Bundle (see page 6 for more information).

## How it works

When a customer walks into your WiFi range, they can connect to the internet for free (daily limit of 50MB per customer) on their mobile device without affecting any of your internet quota.

That's not all. If your customer is an existing iiNet internet account holder, once they've reached the 50MB limit, they can continue browsing the internet by logging into their account and using their own quota. We will install all the required equipment at no additional cost.

If your business can achieve an internet speed of 6MB+, and is located in one of our serviced metro areas (see [iinet.net.au/business/wifi](http://iinet.net.au/business/wifi) for a list of serviced postcodes), free WiFi is available to you.

Give us a call on **1300 795 471** or visit [iinet.net.au/business/wifi](http://iinet.net.au/business/wifi) to find out more.

Minimum cost is over 24-months and includes \$79.95 connection fee. \$0.80/GB. Upload speeds may vary. For factors affecting speed visit [www.iinet.net.au/iinetnetwork/bb2-speeds.html](http://www.iinet.net.au/iinetnetwork/bb2-speeds.html). Upload speed booster only available to on-net customers. Customer WiFi offer only available to eligible customers on the iiNetwork in metro areas, see website for details. Internet speed of 6Mb+ must be available.

“We really wanted to offer our customers free WiFi as it’s now part of our value-added customer service.”

**Voula Nelson**

Mr Nelsons Sandwich Shop  
Subiaco, Western Australia

## Keeping customers connected

**The Business**

Mr Nelson’s Sandwich Shop is a bustling café nestled in the heart of Subiaco, Western Australia. From office workers through to students and local residents, customers are constantly streaming in and out of the café to buy their morning coffee, have lunch meetings or are simply grabbing a bite to eat.

**The iiNet Solution**

Voula Nelson, owner of Mr Nelson’s Sandwich Shop, has been in Subiaco for five years but recently signed up for iiNet’s Business Bundle with WiFi when the café was rebranded.

In this day and age, customers expect to be connected to the internet when they’re out so we felt it was time to provide them with this feature, especially in a competitive hospitality industry.”

“iiNet’s customer service has also exceeded all my expectations

as the installation process was smooth and hassle-free.

It was a great help getting the iiNet technicians on premises to install the access point and set up the WiFi – they didn’t leave until my EFTPOS machine was up and running. I’m not an IT savvy person and have no time to learn, so having these resources at my fingertips saved me a lot of effort.”

“I’ve had absolutely no issues with my WiFi at the café so far, and trust me in the hospitality industry I’d know if I had any unhappy customers! I’m really happy with the service and speed, and I’ve no doubt providing free wireless access will result in more customers and more sales.”

- Find out how you can keep your customers connected, give us a call on **1300 796 025** or visit **[iinet.net.au/business/wifi](http://iinet.net.au/business/wifi)**

# iiNet ADSL2+ Business Bundles

Looking for value for money bundles with award-winning customer service? Our most popular internet connection with the widest range of plans are perfect for small or home offices with standard requirements. All our Business Bundles include Business Phone – with all your local and standard national calls plus great international rates.

## Business Broadband

Basic Bundle	Value Bundle	Enhanced Bundle	Premium Bundle
<b>\$79.95</b> /month	<b>\$99.95</b> /month	<b>\$119.95</b> /month	<b>\$139.95</b> /month
<b>100GB</b> (\$0.80/GB) Minimum cost \$1998.75	<b>300GB</b> (\$0.33/GB) Minimum cost \$2478.75	<b>600GB</b> (\$0.20/GB) Minimum cost \$2958.75	<b>1200GB</b> (\$0.12/GB) Minimum cost \$3438.75

### Business Phone

- ✓ Local and standard national calls included
- ✓ Calls to Australian mobiles 37c per minute charged per 30 second block, 44c flagfall
- ✓ International calls – \$1.98 for up to 30 minutes for top 20 countries, 44c flagfall
- ✓ 1300 & 13 calls – 35c untimed

### Included Upload Speed Booster

A business-only add on offering up to double your existing upload speeds.

### Add a Call Pack

Choose to add any of our call packs to your Business Phone service for even greater value.

#### ■ Mobile Call Pack

All calls to standard Australian mobiles for only **\$20/month** (Minimum cost \$2018.75)

#### ■ International Call Pack

All calls to landlines in our top 20 countries for only **\$10/month** (Minimum cost \$2008.75)

Minimum cost is calculated over a 24 month contract and includes \$79.95 ADSL2+ connection fee. This does not include the cost of the modem or any other telephone connection fees that may apply. Speed shaped to 512kbps once quota exceeded. Note services are not available in all areas. International call rates vary by destination. For full rates go to [www.iinet.net.au/phone/home/international](http://www.iinet.net.au/phone/home/international). Upload speed booster only available to on-net customers. Upload speeds achieved may vary.

## Speeding up business

### The Business

Studio Commercial is an employee owned collaborative photography studio based in the heart of the Sydney CBD, with more than 16 years of experience in advertising, fashion, editorial and corporate photography.

Headed up by managing director and photographer Jason Doyle, Studio Commercial consists of five photographers who work on a variety of projects for clients such as Ernst & Young, JP Morgan, Krispy Kreme and Panasonic.

### The iiNet Solution

Being a small studio with a high profile client base means that time is of the essence when it comes to meeting deadlines and communicating with both internal and external parties.

Additionally, working in the fast-paced advertising, marketing and fashion industry requires a relatively swift turnaround with minimal technical issues, one of the many reasons why Jason Doyle has been an iiNet customer for the past nine years.

In 2005, Studio Commercial found themselves at a crossroads when the uptake of digital photography within the business resulted in huge file sizes that were difficult to send via their existing internet service provider.

Because of iiNet's reliable and affordable Internet packages, Studio Commercial came on board as a business customer.

"Many of our files are too large to send via email so we typically

upload them onto a server like Dropbox and send clients a link to download the images," said Jason. "That quick upload time really does make a difference as about 20 per cent of our clients require the images extremely urgently, so that certainly plays a big part into getting stuff to our clients quicker." "Now, sending files virtually is no longer the problem – it's how fast we can actually get the images retouched!" Jason jokes.

Customer service is also something that Studio Commercial prides itself on delivering, whether it's helping both big and small clients with their brief, scouting locations, organising catering or sending customised quotes to clients within 24 hours.

That's why Jason knows first-hand how important it is to be efficient, professional and reliable, and looks for these qualities when it comes to his connectivity services.

"Bad customer service in the telecommunications industry is the biggest complaint I hear about from friends and family. As an example, my Mum and Dad in their late 70s had some problems with their non-iiNet phone service and I was trying to help them resolve their problems.

I got passed around to four different people before I found someone that could help me. That never happens with iiNet, you just speak to the one person and they always help. It's efficient, worry-free and just works."

- Want to find out more about our great value Business Bundles, give us a call on **1300 796 025** or visit **[iinet.net.au/business/wifi](http://iinet.net.au/business/wifi)**

# iiNet NBN Business Bundles

The National Broadband Network (NBN) is a national network of communications infrastructure currently being built by NBN Co on behalf of the Federal Government. It is about to make the internet faster and more reliable than ever before and will change the way you do business.

Available only in NBN-ready areas.

## Business NBN

NBN Business 1	NBN Business 2	NBN Business 3	NBN Business 4
<b>\$79.90</b> /month	<b>\$99.90</b> /month	<b>\$119.90</b> /month	<b>\$139.90</b> /month
<b>50GB</b> (\$1.40/GB) Minimum cost \$1038.75	<b>250GB</b> (\$0.36/GB) Minimum cost \$1278.75	<b>500GB</b> (\$0.22/GB) Minimum cost \$1518.75	<b>1000GB</b> (\$0.13/GB) Minimum cost \$1758.75

Minimum cost over a 12 month contract includes monthly plan fee + activation fee of \$79.95. This does not include the cost of the modem. Note services are not available in all areas. International call rates vary by destination. For full rates go to [www.iinet.net.au/phone/home/international](http://www.iinet.net.au/phone/home/international). Cost per GB based on price of broadband only (excluding Netphone).

### Business Netphone

- ✓ Local and standard national calls included
- ✓ Calls to Australian mobiles 29c per minute charged per 30 second block, 39c flagfall
- ✓ International calls – From 5c per minute
- ✓ 1300 & 13 calls – 30c untimed

### Add a Call Pack

- **Mobile Call Pack**  
All calls to standard Australian mobiles for only **\$10/month** (Minimum cost \$1048.75)
- **International Call Pack**  
All calls to landlines in our top 20 countries for only **\$10/month** (Minimum cost \$1048.75)

### Connection Speeds

Download speeds to suit any business. We'll assist you in assessing the speeds available at your premises.

<b>Fast</b> Included		up to <b>25Mb/s</b> / <b>10Mb/s</b>
<b>Faster</b> (+\$10 per month) Min. cost \$1158.75		up to <b>50Mb/s</b> / <b>20Mb/s</b>
<b>Fastest</b> (+\$15 per month) Min. cost \$1218.75		up to <b>100Mb/s</b> / <b>40Mb/s</b>

These are the maximum theoretical wholesale NBN access speeds provided to us by NBN Co and may not be achieved. Speeds could be slower and may vary due to various factors such as number of users or connections, the end-user's hardware and software, source and type of content downloaded. Your speeds will be shaped to 512/512kbps once included quota has been exceeded.

### Ready for the NBN?

The NBN is set to change the way Australian businesses access the internet, with lightning-fast fibre-optic, fixed wireless and satellite technology being made available over the next 10 years. With super-fast internet on its way, we're here to help your business get NBN ready.

1. Check your address to find out if the NBN network is available to you and what equipment you need. Check your address at [iinet.net.au/business/nbn](http://iinet.net.au/business/nbn)
2. Pick your NBN plan from an internet service provider. Once you know the NBN is rolling out in your area, you'll be able to choose an NBN plan. From our great value 50GB plan through to our generous 1000GB plan, you can enjoy speedy downloads and make long waits a thing of the past.
3. Make sure you plan ahead and order an NBN business plan at least 12 months before your disconnection date, as your landline and internet services will be cut off if you don't move them to the NBN network before the advised date. If you have an EFTPOS terminal, check with your bank or device provider.
4. NBN Co will be installing an NBN utility box to the outside wall of your business at no cost to you. When your area is ready for service, NBN Co will install your connection box inside your premises. If you upgrade to iiNet, we'll manage this process for you.

## Getting up to speed with NBN

### The Business

Omega is a family-owned print company that offers the full suite of design and printing services for the past 24 years and have been an iiNet customer for the past 20.

### The iiNet Solution

Working in the print industry means large files are constantly being transferred on a daily basis, which was one of the main reasons why Omega's Managing Director Mark Homan looked to NBN to upgrade his internet connection.

"Since we got the NBN, the speed of uploading and downloading files have improved dramatically, freeing up much valuable time.

We're also able to make VoIP calls on our super-fast connection, which means no line rental and reduced call costs.

We now pay far less than we did with a traditional landline and it works just as effectively."

Mark values iiNet's high level of customer service and reasonable prices, initially working with iiNet's fibre team to transfer their fax line from copper cabling to a VoIP connection.

"Though it was a complex process, iiNet's tech professionals made this a seamless process and provided great customer service. With iiNet as my service provider it's been a truly gratifying business partnership and I would never consider moving elsewhere."

- For more information on iiNet Business NBN, give us a call on **1300 796 025** or check out our website at [iinet.net.au/business](http://iinet.net.au/business)

# iiNet Hosted Microsoft Exchange

iiNet Hosted Microsoft Exchange is enterprise class email for everyday small businesses. You get seamless integration with Outlook, a rich web client, synchronisation across your mobile devices and tools for improved team collaboration, with a 30 day money back guarantee.

## Hosted Microsoft Exchange

<b>Exchange 1</b> <b>\$2.95</b> per mailbox/month <b>3GB</b> email storage	<ul style="list-style-type: none"><li>▪ Great value for money</li><li>▪ POP/IMAP support</li><li>▪ Outlook Web Access</li><li>▪ Ideal for retail/kiosks, temp staff and shift workers</li></ul>	<b>Exchange 2</b> <b>\$6.95</b> per mailbox/month <b>25GB</b> email storage	<ul style="list-style-type: none"><li>▪ POP/IMAP support</li><li>▪ Outlook Web Access</li><li>▪ Sync emails, calendars and contacts</li><li>▪ Mobile push notifications</li><li>▪ Ideal for management/mobile work/home office</li></ul>
---	---	--	--

iiNet Hosted Microsoft Exchange is available in 2 plans starting from \$2.95/mailbox per month, no lock-in contract required. To utilise the service customers must have a domain name registration and existing broadband connection. Maximum of 50 mailboxes per subscription and one subscription per customer.

## Benefits of Microsoft Hosted Exchange

- ✓ Use your own domain name
- ✓ Sync and keep track of emails, calendars and contacts across multiple devices/computers.
- ✓ Even if your office loses connectivity you will still have access to emails, calendars and contacts, providing robust business continuity.
- ✓ Manage your employee's mailboxes, create aliases, forwards and multiple domain names using the advanced control panel.
- ✓ Packed with extras – anti-spam and anti-virus protection included, 30MB outgoing message size, 14 day deleted items retention and no contract required.
- ✓ Supported by our award-winning customer service team. Our dedicated and experienced hosting team is ready to take your call.

## Hosted SMS messaging

With prices starting from \$10/month for 100 SMS messages\*, iiNet Hosted SMS enables you to send, receive and manage SMS messages just like email.

No additional hardware or software is required.

Save drafts and view sent items, message multiple contacts simultaneously and track conversation in a familiar Outlook environment.

\*iiNet Hosted SMS is available in 3 plans starting from \$10/month, no lock-in contract required. To integrate Hosted SMS with an Outlook mail client, customers must have an iiNet Hosted Microsoft Exchange service. SMS messages included in each plan can be used across multiple user accounts and replies received are free. Any unused messages expire in that month. Excess usage will require an additional SMS messaging plan to be purchased. Messages with total length over 160 characters may appear as one message but will be transmitted and billed as multiple SMS messages.

# iiNet Business Cloud

Is your business on the iiNet Business Cloud yet? If not, you're missing out on a load of benefits, and saving money is just one of them. Think of our Cloud as having your own virtual data centre to create and organise as many virtual machines as you like, but without the hassle of managing the infrastructure behind it. It's an enterprise-grade Cloud service at small business prices, with no lock-in contract.

## Business Cloud Plans

	Cloud 1	Cloud 2	Cloud 3	Cloud 4	Custom
Minimum fee per month	\$29	\$59	\$149	\$349	iiNet can customise a quote tailored to your business requirements  Give us a call today on <b>1300 704 794</b>

Maximum CPU (GHz)	1GHz	4GHz	8GHz	16GHz	
Maximum storage (GB)	50GB	150GB	500GB	1000GB	

## Benefits of Business Cloud

- ✓ Reduce capital outlay and pay monthly for your servers with no contracts.
- ✓ Flexible billing model that changes with your business needs.
- ✓ Hosted and supported locally in Australia with award-winning customer service.
- ✓ Connected to iiNet's very own national high-speed network.
- ✓ Enterprise level Service Level Agreement with a minimum 99.5% availability uptime.
- ✓ Built on enterprise-class equipment from Cisco and NetApp, powered by industry leading VMware vCloud Air.

To sign up or get a customised quote give us a call on **1300 704 794** or visit [iinet.net.au.business.cloud](http://iinet.net.au.business.cloud)

iiNet Business Cloud comes in 4 standard plans starting from \$29/month, no lock-in contract. Custom plans are available on request. If the total monthly cost for all servers and network charges within the plan exceed the min. monthly fee, we will charge you on a pay-per-use basis. Network charges are \$0.12/GB per month and storage (10K SAS) is \$0.18/GB per month. The max amount that can be charged is based on each plan's maximum RAM, CPU and storage (1GB, 1GHz and 50GB for Cloud 1; 8GB, 4GHz and 150GB for Cloud 2; 32GB, 8GHz and 500GB for Cloud 3; and 64GB, 16GHz and 1000GB for Cloud 4). Windows Licensing Fee is 2c/license/hour and external IP is \$3/IP/month. iiNet includes 1 external IP with every Cloud account.

# iiNet Microsoft Lync Desk Phone

Costly business phone and line rental? Switch to iiNet Microsoft Lync and Desk Phone today. It's the complete communication solution for your business, bringing together the best of video conferencing, instant messaging, innovative telephony and virtual collaboration. Whether you're looking to upgrade your existing phone system or require a brand new phone setup for your business, we can provide a complete hosted voice solution that saves you money.

"When we were looking around for a teleconferencing solution, we immediately thought of iiNet. As strategy director I'm often out and about meeting new clients and attending various functions.

Before Lync, it was hard to stay constantly in touch with my staff and colleagues, apart from using email. Now it's become much easier to join meetings and get updates on my phone, tablet or laptop.

From my experience using iiNet at home for my broadband connection, I already knew that customer service would be a standout feature so it was really a no-brainer for us to sign up."

#### **Zion Ong**

Co-founder, Alyka Digital Agency  
Perth, Western Australia

## Why choose Lync?

### ■ Reduces your phone bill

Included local and standard national calls and no line rental, plus you get a phone handset.

### ■ HD-enabled Polycom handset

With features like background noise suppression, call transfer, group calls, voicemail to email and LCD touch screen\* you're getting best value for money.

\*Only available on VVX500 and 600.

### ■ Comes with teleconferencing and Instant Messaging

Lync combines the best of video conferencing, instant messaging, virtual collaboration and innovative telephony in a single, unified communications solution.

### ■ Works seamlessly with Outlook

Lync integrates with Outlook\* to let you schedule Lync meetings

from your calendar and reply to an email with a call or IM, on your desktop, tablet or smartphone.

\*If purchased with iiNet Hosted Microsoft Exchange plans.

### ■ Award-winning support

Our dedicated, round-the-clock support staff and priority business line means we're here for you when you need us.

### ■ Value for money

Our phone plans start from just \$29.95 a month on a 24 month contract\* and include all local and national calls. It offers better value than a traditional landline as calls are made over your internet connection.

\*Minimum cost \$718.00

# iiNet Microsoft Lync Desk Phone Plans

Our new Business Desk Phone takes traditional phone calls to the next level. From just \$29.95 a month, you get a state-of-the-art handset with standard local and national calls from your own number included. ## Package with one of our handsets

With a great range of mobiles available, you can package your 4G Mobile Voice Plan with a new handset of your choice.

## Or bring your own mobile

Our mobile plans can be purchased as SIM-only, so you can enjoy great call and data value with your own mobile handset.

## All SIM plans include these neat extras:

- No lock in contracts
- Keep your existing phone number
- Alerts when you're close to your cap
- Mobile calls within your fleet included
- 24/7 customer support
- Choice of dual-cut or nano SIM

### Corporate internet services that scale with your operations

iiNet's internet services deliver the next generation of high performance, fully symmetrical IP connectivity.

Tailored for those seeking a solution that may exceed the limits of their existing network, our Ethernet services can scale from 2Mbps to 10Gbps of symmetrical bandwidth.

**Fast** – Symmetrical upload and download speeds, and high performance connections beyond a standard ADSL line.

**Scalable** – Ability to increase or decrease bandwidth and quota based on your business requirements.

**Flexible** – Usable for a wide variety of applications including voice and video services.

**Reliable** – With minimum 99.5% uptime SLA, we have your business covered.

**Service** – With award-winning support and direct access to a dedicated account manager.

From file sharing and backup servers to connecting multiple offices together, our Business Ethernet can connect to a range of existing networks including the internet, private IBC networks or co-location.

Give us a call on **1300 796 025** to find out more today.

## iiNet Bonded Internet

### From \$249 a month

Min cost \$5998.80

iiNet Bonded Internet is simple, super-fast internet that combines the speeds of up to five internet connections into a single link.

Think of it like adding lanes on a freeway. Need to move more traffic? Just add additional lanes. Twice as many cars will get there in the same time.

Using iiNet Bonded Internet, no matter how many lanes you have, your applications and the outside

world just see a single connection, one that is faster, more reliable and more intelligent.

Only available for businesses with 15+ employees.

■ For more information on iiNet Bonded Internet, give us a call on **1300 796 025** or check out our website at **[iinet.net.au/business](http://iinet.net.au/business)**

\*Bonded Internet combines multiple Internet connections into a single service to provide higher bandwidth and failover. This is applicable to any type of internet connection including ADSL broadband connections. The price of Bonded Internet includes an on-site bonding appliance and the internet connections required. Telephone connection fee may apply.

Bonded Internet is only available to businesses with at least 15 employees. Minimum total cost over a 24 month contract is \$5998.80 (\$249.95 monthly Bonded Internet Value plan fee x 24 months). Please note telephone connection fees may apply. This does not include the cost of the modem or any optional extras not listed above which may be added or removed from time to time.

## Starting a new business?

Home-based businesses are among the most common types of businesses in Australia and it's easy to see why, as rental and other overhead costs can add up quickly.

For home businesses, saving on fixed costs can free up funds that can be used for IT expenses such as broadband, telephony and cloud solutions.

For the first time entrepreneur, a stable internet connection, an efficient email service and a website are basic essentials that will help get a home-based business up and running. Depending on the type of business you're engaged in, you may also need networking or cloud storage solutions if you need to connect with other offices or transfer a lot of data.

So if you're starting a business, be sure to sort out your IT early so you can focus on your first sale and customer service instead of worrying about technology.

# Upload files faster than you can read this headline.

If you're in a fast-moving business, the last thing you want is sluggish upload speeds slowing you down. That's where our unique business upload booster can help. It offers up to double your existing ADSL2+ upload speed – perfect for sending large files and taking those awkward time delays out of video conferencing. So if you want your business to experience faster speeds, you'd better call iiNet. Quick.

<p>Basic Business Bundle <b>\$79.95</b> /month Total min cost \$1998.75</p>	 <p>100GB Broadband</p>	 <p>All Local &amp; Standard National Calls</p>	 <p>Upload Booster</p>
