

# iiNet Business VoIP

If you want to start saving on your business call costs, get VoIP into your vocabulary. With VoIP (Voice over Internet Protocol), all your business calls are made over your broadband connection, but at a fraction of the cost.

VoIP is easy to set up using your existing phone handset and comes with your own unique phone number you can call from any phone.

Business NetPhone is only available when you have an iiNet broadband service.

	Business NetPhone
Monthly cost	<b>\$9.95*</b>
Calls to iiNet VoIP numbers	Included
Local calls	Included
Standard national calls	Included
International calls	From 5c/min**
Calls to Australian mobiles	29c/min (charged per 30 second block)
1300 and 13 numbers	30c/call

\*Minimum total cost is \$1768.70 (\$9.95 Business NetPhone fee + \$69.95 business broadband monthly plan fee on a 24 month contract + \$79.95 activation fee). Excludes cost of modem.

\*\*International rates vary by destination, all of our international rates can be found on our website: [www.iinet.net.au/phone/netphone-voip/international](http://www.iinet.net.au/phone/netphone-voip/international)

## Business VoIP features:

- Voicemail
- Voice messaging to email
- Call waiting
- Three way calling
- Track calls online
- Only **5c per minute** to the UK, USA, China, NZ, Singapore, Malaysia & more\*\*

## Talking hardware...

To start making VoIP calls, all you'll need is either a VoIP adaptor or a VoIP enabled modem/router. Connect either of these to a standard phone and you're away.

## Is VoIP suitable for you?

VoIP differs from Business Voice in that it's a BYO phone system. You get great call rates and can save even further by using your existing phone system.

So it's suitable for small businesses under 10 employees who have existing hardware. For over 10 employees it may be worth looking at our SIP Trunking service.

For more information on iiNet's Business VoIP, call us on **13 24 49** or visit [iinet.net.au/business](http://iinet.net.au/business)

iiNet is Australia's second largest DSL provider and number one in customer service.
